MiWAY MISSISSAUGA

MiWay Five 2016-2020 | MiWay is Rolling Out Improvements Across the City

MiWay Five is a five-year service plan (2016-2020) that is moving Mississauga's transit system from a design that radiates from the city centre to a grid network.

The plan allows for more frequent buses along main corridors, and more transit service expansion as MiWay prepares for the completion of the Mississauga Transitway later this year. Eleven stations and 17 kilometres of the 18 kilometre transitway are now open.

Ten Benefits of MiWay Five:
